PRECAUTIONS TAKEN TO PREVENT SPREAD OF SCARLET PEVER.

There Has Been Twenty-Six Cases of Sear let Fever Reported to Sanitary Officer Healey Since January-Only Ten Cases Now Under the Doctors' Care-How Superintendent Dyer of the City Schools Keens the Disease From Spreading-He Has Each Teacher Report to Bim of Any One Who May be Afflicted.

There are quite a number of cases of scarlet fever reported in different parts of the city. Although there is not an enidemic every precaution is being taken by the health officer and by Superincendent Dyer to keep the disease from spreading among the school children.

It has only been a little over a year that all contagious diseases have been reported to the health officers. When Superintendent Dyer took charge of the city schools he made arrangements with the city health officers whereby every case of a contagious nature was reported to him at the same time that it was recorded on their books. Mr. Dyer took this mode of preventing the spreading of any diseases among the school children. There is no doubt that his thoughtfulness has prevented an epidemic on more than one occasion. Last year the reporting of every case to him undoubtedly is 42 years old and says she feels as well kept the schools from closing on account as when she was 16. Hood's Sarsaparilla of the diphtheria, which at one time last made a complete cure in her case." winter had a good start among the Miss Mary Mascarie, Ironton, Ohio.

There is a health record book kept in the police department wherein all contagious diseases are recorded. This record is under the personal supervision of Sanitary Officer P. V. Healy. Under a state law, as well us a city ordinance, compelled to report every case to the department as soon as it is known to them. Mr. Wells left with his prisoner on the As soon as this is done Mr. Healy takes afternoon train. a transcript of the report and gives it to Superintendent Dyer immediately. The blanks on which Mr. Healy makes out his statements of the contagious diseases give the date, the name, the age, sex, color, disease, where located, by whom reported, attending physician, re-

sick and then sends word to the princiative they are then requested to go home and discontinue coming to school until Toler arrested. they have a certificate from their physi- THOUGHT HE HAD BEEN TOUCHED cian stating that all traces of the discase has been eradicated. Professor Dver sends a duplicate to the High school, where the same procedure is gone through as in the ward schools. This is done because the High school draws from every section of the city.

After Mr. Healy has reported to Mr. Dyer he then goes to the house where whom he called his friend and who gave the disease is reported and puts up a the name of O. L. Cowan. Mr. Blake, in than coal. There are beds of asphalt, certain colored card upon which is print; an incoherent manner related to Captain ed the nature of the disease. Stomach Was Too Weak to Retain Food

A Complete Cure Effected by Hood's Sarsaparilla

Now Enjoying the Best of Health, With Digestion Perfect.

"My mother was subject to sick headaches and indigestion for over a year. She was unable to stand for any length of time, and was obliged to stay in a dark room as she could not bear the light. She had no appetite whatever and her stomach was so weak she could not retain what food she did eat. She also had severe pains in her head. She suffered so much that she became but the shadow of herself. One day I happened to read a testimonial about Hood's Sarsaparilla. It

Sounded So Truthful

I persuaded her to try this medicine. Before finishing the first bottle there was an improvement in her condition. She no longer threw up her food and her headache was not as severe. She took in all four bottles of Hood's Sarsaparilla and several boxes of Hood's Pills and regained her weight. She is now enjoying the best of health. Her digestion is good and she can eat almost anything she wishes. She

INDIAN TERRITORY COUNTRY TO LET FOR HOMESTEAD.

Assistant United States Attorney D. M. Brown Says it is the Opinion of the iness Men of South McAlester and Other Towns That the Indian Territory Country Will be Opened for Settlement Within a Year-McAlester Will Be an Aggressive Candidate for the Capital-Rich Vein of Sub Authracite Coal.

D. M. Brown, now assistant United States attorney for the Indian Territory, Mr. Brown's official residence is at South McAlister, and he says it is the busiest, most vigorous town of its size he has seen for several years.

"All night long," he said, "the local motives are puffing in confusion, the cars bumping and the wheels grinding-car after car is filled with coal till a score has slipped by the shaft, then it is repeated with another engine and other cars. At dawn it is certainly a pretty sight to watch the long trains, one after another steam away in every direction. That whole country is underlaid with a hed of the best kind of sub-anthracite and it's not very far from the top of the ground either. MoAlister is certainly a remarkable town. That country will be opened up for settlement within a year, and McAlister will be a strong candidate for the capital."

"Won't that territory be combined with Oklahoma if it is thrown open?" "No. The business men of McAlister and surrounding towns do not think so. Oklahoma is ble enough and rich enough for a state of itself and the territory is as large with certain diverse interests and it is not probable that the two will

be put together." "What makes you think the country

"It is in the air at McAlister, at Krebs and Hartshorn, Atoka and other towns. I attended a banquet in McAlister Saturday night, at which there were forty representative men, and all the toasts and responses were full of sentiment for opening. They not only favored opento have information from the interior
